## appbiz360 Framework

### fimo360

fimo360 lets entrepreneurs intelligently detect, analyze and remotely fix certain field issues, while ensuring minimal security measures for the app in the real world scenario.

### engager360

engager360 facilitates user acquisition & retention for entrepreneurs through its unique features & functionalities.

# appbiz360 - an Overview

Since inception in 2008, appbiz360 has been delivering high-performing, dynamic, engaging, and innovative mobile app solutions to startups & businesses across the globe. As a trusted mobile app development company, appbiz360 uses its path-breaking framework to help mobile app startups write their success story! So far, we've successfully developed, tested, and deployed hundreds of mobile apps on multiple platforms for our global clientele.

## Our Mission

appbiz360 strives to bring about revolutionary change in the lives of hi-tech mobile app entrepreneurs by helping them achieve success through innovative app development and troubleshooting in the real world scenarios.

*Our mission is well supported by our ingenious appbiz360 framework – a unique toolkit consisting of SDKs (fimo360 and engager360) that help businesses analyze, monitor, and remotely fix app field & security issues and acquire & retain more customers.*

## Our Vision

Our vision is to lead the mobile app development sphere by delivering sophisticated yet user-friendly mobile app solutions to startups and businesses across the globe.
